The special feature of the biodegradable packaging bags for coffee

1.Accurate text printing, correctly delivering advertising information

Professional color printing without any overflow

3.The easy-to-tear design is convenient for consumers to open the package, and our process can ensure the position of each easy-to-tear port is consistent.

4.The tightly zipper, made of PLA, which can be opened and closed repeatedly,

Guarantee the tightness of the bag. Can be degraded in the soil

5.Strong square bottom , with large carrying capacity. keep every pouch standing up like trained soldiers

6.Strong tensile. The packaging bag with good tear resistance and durable

7. With aluminum foil. The feature of AL is with high temperature resistance (121 ° C), low temperature resistance (-50 ° C), good oil resistance and good aroma retention performance. And with Non-toxic and tasteless, in line with food and pharmaceutical packaging hygiene standards.

8.High quality white Kraft paper, biodegradable PLA film, it's environmentally friendly and great value

9.Excellent waterproof performance

The aluminum foil bag is waterproof and moisture-proof, and it is easy to cope with the low temperature and wet season.

10.High quality ECO friendly packaging bags for coffee bean packing. No more pollution to the environment, more clean to the world.

The Picture of biodegradable valve for the packaging bags

1.In the market, 99.9% of the air valves are made of PE plastic, and it takes 1000 years to completely degrade. It is a great harm to the environment. However, the PLA air valve is made of plant material and can be degraded in the soil within 2-3 years. Become water and carbon dioxide absorbed by plants.

2.It is technically difficult to make an air valve from PLA. This technology is in the hands of a very small number of manufacturers, OEMY company is one of them.

The recommended size of side packaging bags
