The Picture of biodegradable valve for the packaging bags

---

1. In the market, 99.9% of the air valves are made of PE plastic, and it takes 1000 years to completely degrade. It is a great harm to the environment. However, the PLA air valve is made of plant material and can be degraded in the soil within 2-3 years. Become water and carbon dioxide absorbed by plants.

2. It is technically difficult to make an air valve from PLA. This technology is in the hands of a very small number of manufacturers, OEMY company is one of them.

## The Application of packaging bags

1. Biodegradable packaging bags are environmentally friendly bags that are very versatile. Mainly used for packaging: coffee bean, coffee powder, Tea leaves, Rice, dried fruit, snack food, dried meat, whole

grains, tea ,etc.

2.It's time to change your plastic packaging bags to biodegradable packaging bags. Less pollution to the environment, more green to the world.
